Portraits of Marine Invertebrates: the Backbone of Life

Photographs by Susan Middleton

exhibit August 6 - October 1, 2017

Tue-Sun, 10 am - 5 pm, Schaefer International Gallery

Also open on evenings of select Castle Theater events. Closed Aug 18, Sep 30

Acclaimed photographer, Susan Middleton (well remembered for her previous exhibitions at MACC, "Remains of a Rainbow" in 2004, and "Archipelago: Portraits of Life in the Northwestern Hawaiian Islands" in 2007), brings us a new body of work exploring the mysterious world of marine invertebrates: underwater animals without backbones. More than 98% of known species in the ocean are invertebrates, yet as the foundation for life in marine waters, they are relatively unknown. Her images capture the unexpected beauty and intimacy of this realm of life. With a deep passion and investment in time and research she reveals astonishing creatures we may never get to see. FREE Admission!
